

Earth Science Flashcards

Cut out your flashcards along the dotted line. Then, fold each flashcard along the solid line and tape it closed. Use the remaining time to practice using your new flashcards!

| | |
|----------------------|-----------------------------|
| Water Cycle | Movement of water on Earth. |
| Evaporation | Liquid to vapor. |
| Condensation | Vapor to liquid. |
| Precipitation | Rain, snow, sleet, hail. |

| | |
|----------------|----------------------------|
| Fossil | Preserved ancient remains. |
| Volcano | Magma erupts from Earth. |
| Magma | Melted rock underground. |
| Lava | Magma above ground. |

| | |
|------------------------|-----------------------|
| Earthquake | Ground shaking. |
| Plate Tectonics | Moving Earth plates. |
| Erosion | Wearing away land. |
| Weathering | Breaking rocks apart. |

| | |
|-------------------------|-----------------------------|
| Sedimentary Rock | Layered rock. |
| Igneous Rock | Cooled magma rock. |
| Metamorphic Rock | Changed by heat & pressure. |
| Earth's Layers | Crust, mantle, core. |

| | |
|--------------------|--------------------------|
| Atmosphere | Gas layers around Earth. |
| Ozone Layer | Protects from UV rays. |
| Climate | Long-term weather. |
| Mineral | Naturally formed solid. |
